# Onesimus Director — Backup Throughput Benchmark

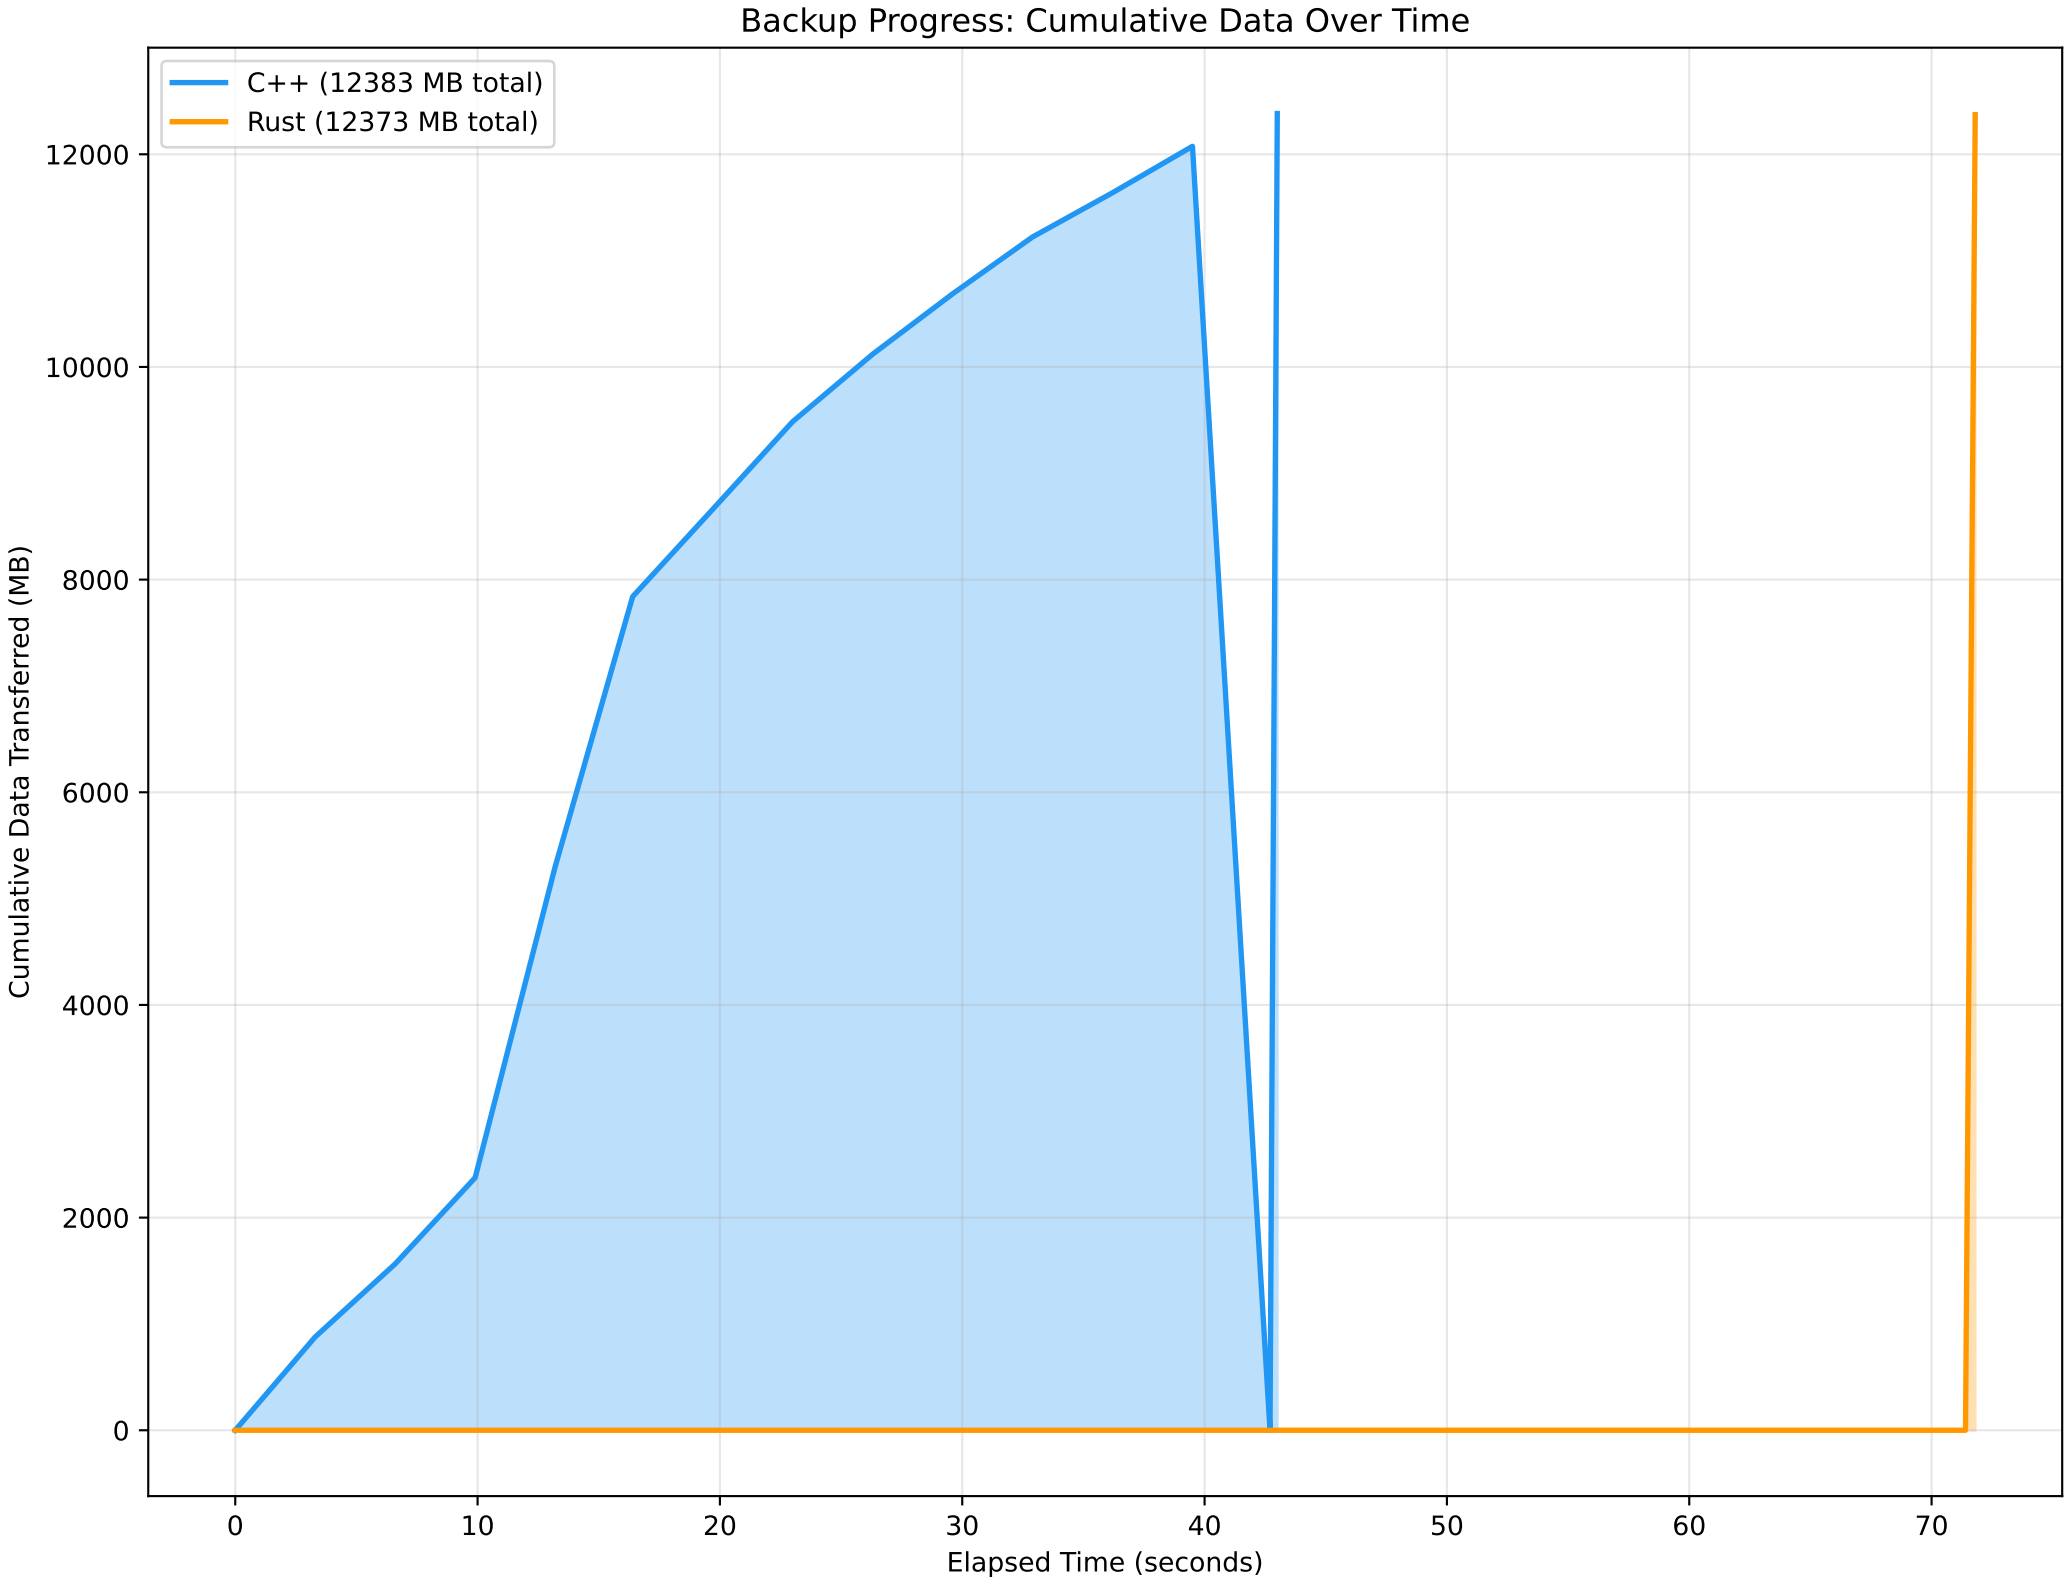

Host: WS-JOERG  Platform: debian family  OS: Linux-6.12.74+deb13+1-amd64-x86_64-with-glibc2.41
CPU: AMD Ryzen 9 9950X 16-Core Processor  RAM: 60.4 GB  Arch: x86_64

FileSet: /usr/bin, /usr/sbin, /usr/share
Files: 166,733  Directories: 15,091  Total size: 4.03 GB

*Test conditions: Both Directors ran sequentially (never parallel) on the same host, same config, same catalog DB, same FD/SD. No other applications were running during the test.*

| | C++ Director | Rust Director | Delta |
|---|---|---|---|
| JobId | | | |
| Status | T | T | |
| Files | 181,887 | 0 | |
| Data (MB) | 12,383 | 12,373 | |
| Duration (s) | 43.1 | 71.9 | 0.6x |
| Avg Throughput | 287.3 MB/s | 172.1 MB/s | 0.6x |
